Lamprell is a leading provider of diversified engineering and contracting products and services to the onshore and offshore oil & gas and renewables industry.

## 02 / Corporate profile Who we are

### Our position

Lamprell, based in the United Arab Emirates (“UAE”), and with operations throughout the region, has played a prominent role in the development of the offshore industry in the Arabian Gulf for over 30 years and is the regional market leader in the rig market. Today, Lamprell is a leading provider of diversified engineering and contracting products and services to the onshore and offshore oil & gas and renewables industry.

### Our Strengths

Lamprell has grown strongly over recent years, driven by buoyant conditions in the oil and gas industry and the increase in capacity the opening of the Hamriyah facility in 2007.

**New build offshore** Lamprell has recently extended its jackup and liftboat services to include new build construction projects on an engineering, procurement and construction (“EPC”) basis. The complete construction of a new build jackup rig commences with the engineering phase. Lamprell obtains the basic design for the rig from LeTourneau Technologies Inc.

The Jebel Ali Facility was purpose-built in 2002 and the ongoing improvement and construction plan seeks to ensure that it will remain one of the most modern offshore oil and gas sector construction facilities in the region.

## Hamriyah Facility

Jackup rig upgrade refurbishment projects.

**The Hamriyah Facility**  
occupies a total surface area of approximately 51,000m2 within the Hamriyah Free Zone with approximately 195 metres of direct quayside access. This facility primarily undertakes jackup rig upgrade and refurbishment projects.

**Workforce**  
There is a core workforce in the region of 800 tradesmen at this facility and as with both the

Sharjah and Jebel Ali facilities workforce is supplemented from the local labour market when required to meet the demands of specific projects.

and to meet the anticipated additional needs of the business going forward, Lamprell has signed a 25 year lease for 250,000m2 of land in the Hamriyah Free Zone. This land, when fully developed, will have 1.25 kilometres of direct

quayside access and a low tide water depth of 9 metres. The current facility will continue to be utilised for a period after the new facility at Hamriyah becomes operational from the first quarter of 2009, to allow for a smooth transition of operations between the two sites.

The Sharjah Facility, the lease for which has recently been extended by the Group until July 2013 is located in Port Khalid. It has approximately 360 metres of direct quayside access and it is at this location where the majority of Lamprell's jackup rig upgrade and refurbishment projects are executed.
